

Table or Graph? — result cards

Print one pack per pair. Cut along the grid.

CARD 1

Treatment outcome for all 180 patients, in 6 categories

Table / Graph / Text: _____

If graph, which type: _____

CARD 2

The age distribution of everyone in the cohort

Table / Graph / Text: _____

If graph, which type: _____

CARD 3

Sex of participants: 104 male, 76 female

Table / Graph / Text: _____

If graph, which type: _____

CARD 4

TB notifications each month for the last three years

Table / Graph / Text: _____

If graph, which type: _____

CARD 5

Treatment success rate in each of 8 municipalities

Table / Graph / Text: _____

If graph, which type: _____

CARD 6

Baseline characteristics: age, sex, HIV status, BMI, diabetes

Table / Graph / Text: _____

If graph, which type: _____

CARD 7

Distance to facility, compared across 4 outcome groups

Table / Graph / Text: _____

If graph, which type: _____

CARD 8

The relationship between age and BMI

Table / Graph / Text: _____

If graph, which type: _____

CARD 9

How 180 registered patients became 160 analysed

Table / Graph / Text: _____

If graph, which type: _____

CARD 10

Proportion of patients on each regimen, in 4 districts

Table / Graph / Text: _____

If graph, which type: _____
